## ICE Cabinet Solutions

Product Overview 2025/2026

ICE 25-E01

## Brief Introduction

Founded in 1990, DEGSON is a Global Leader in Integrated Industrial Connectivity and New Energy Solutions, with UL-CTDP, VDE-TDAP and CNAS approved laboratory. DEGSON has passed ISO9001, ISO14001, ISO45001, ISO80079-34, ISO/TS22163 and IATF16949 Management System, and is a national high-tech enterprise.

DEGSON is engaged in supplying highly reliable and durable products to serve global customers. The company has a market-leading capability of mould processing, automatic manufacturing and advanced testing. DEGSON has the complete engineering ability to support global customers with the professional customization solution and value-added service.

DEGSON products are widely recognized in China, the USA, Germany, the UK, Italy, Spain, Turkey, Japan, South Korea, Singapore, etc. totally hundred countries and regions. DEGSON supply high quality products and provide professional services globally in the industry sectors likely industrial automation, instrument, electric power, railway, marine and offshore, new energy, elevator, lighting, security, machinery, E-bike industry, etc. The company won the recognition from partners among Fortune 500 and industry leading enterprises.

Based on the business philosophy of "Clients First, Win-win Strategy, Responsibility Integrity, Excellence Pursuit.", DEGSON continuously integrates professional technical resources, R&D innovation, product manufacturing and technology application capabilities. Relying on global sales network, DEGSON aims to supply series of multiple varieties of high-quality products and services. We provide global customers with professional and quick connected application solutions, help customers continue to create value. DEGSON is making contributions to creating a smart and interconnected world.

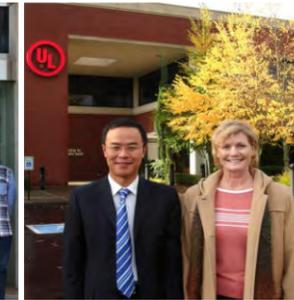

UL-CTDP (USA), VDE-TDAP (Germany) and CNAS labs

### Strategic cooperation with UL and VDE

① The general manager of UL global energy & technology division visit our company

② Sven Ohrke, President of VDE global services, discusses mutual strategic cooperation in DEGSON

③ VDE Laboratory Accreditation: In July 2010, VDE issued the "VDE Authorized Laboratory" certificate to DEGSON laboratory.

UL laboratory accreditation: UL formally issued "UL WTDP" certificate to DEGSON in March 2013.

Registration No. CNAS L18596

Client Test Data Program (CTDP) DA File: DA2645

Test Data Acceptance Program ID Number: 40045483

DEGSON products are very popular more than 100 countries and areas.

**How to achieve reliable and efficient cabinet connectivity?**  
**How to ensure the continuous and reliable power supply in cabinet?**  
**How to transmit or switch analog and switching signals stably and accurately?**  
**How to achieve reliable and high-speed signal acquisition and network communication?**

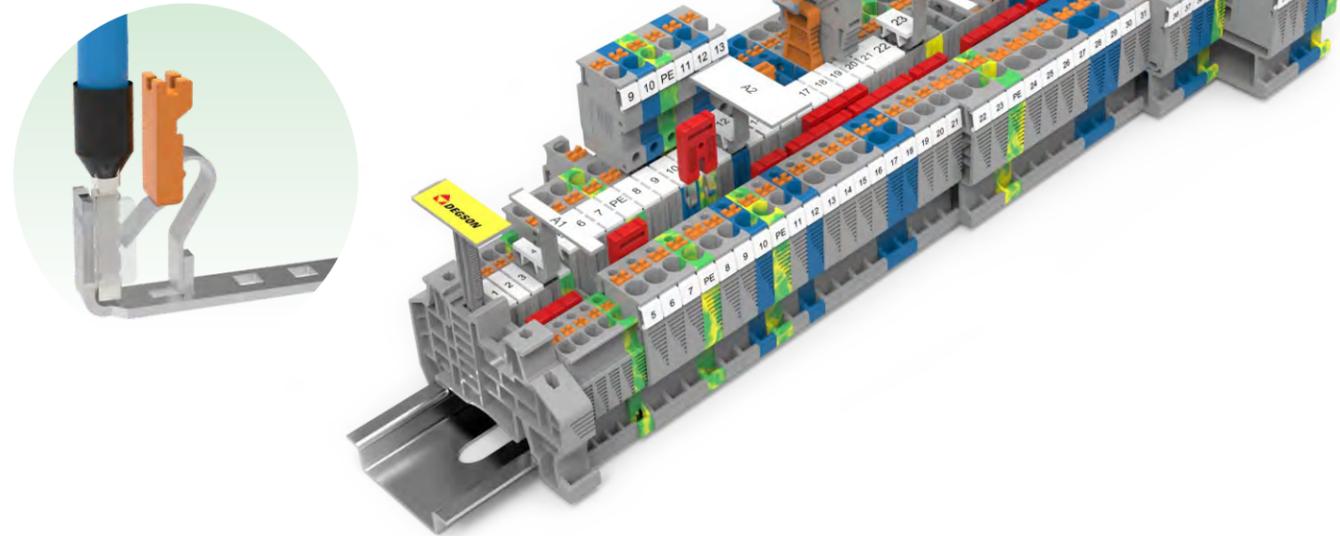

In the design and assembly process of industrial control cabinets, technicians often face the problems above.

DEGSON has a long history of more than 30 years in the field of electrical connection and industrial control, and has rich experience in product and industry applications to provide a comprehensive range of industrial control cabinet product solutions. The products cover the following functions: **power supply and protection, control and communication, cabinet connectivity, signal transmission and switching, functional safety, print & mark systems, master control.**

Through high-quality products and services, DEGSON helps you improve your corporate competitiveness from control cabinet design to assembly.

## DS Push-in connection terminal blocks

- Adopt Push-in connection technology, no tools for wiring, high efficiency and quick connection.
- Double channel bridge position, easy to realize potential distribution.
- Standardized test hole, convenient and fast circuit test.
- Pluggable bridges and rich accessory systems perfectly solve the application needs of the user end.

DS Push-in connection terminal blocks, its stainless steel spring ensures excellent resilience and anti-seismic performance. Even if repeated operation, it can still ensure connection reliability. High-precision copper alloy conductors provide the lowest temperature rise, ensuring reliable and safe connections. PA66 plastic parts can meet the working environment of -40°C to 105°C. The convenient and fast Push-in connection technology can allow the rigid wire and the multi strand flexible wire with cold pressing terminal to be directly inserted without tools, thus minimizing the labor time and labor cost. At the same time, rich functional product solutions can easily realize short-circuit / overload protection, short -circuit test, plug-in and other application requirements.

## WS Spring-cage miniature connection terminal blocks

- Proven Spring-cage connection technology with excellent seismic performance.
- The spring compression force is constant, and the connection is stable and reliable.
- Pluggable bridge, high circuit connection efficiency.

WS-Spring-cage connection terminal blocks adopt high-quality alloy structure, provide reliable and durable connection products. At the same time, the proven Spring-cage connection terminal blocks has excellent seismic performance and excellent performance in high vibration occasions such as railway, ship and equipment manufacturing. PA66 plastic parts can meet the working environment of -40°C to 105°C.

## STB Spring-cage terminal blocks

- Proven spring-cage connection technology with excellent seismic performance.
- With large wiring capacity, it can be connected to rated conductors with or without ferrules.
- Double-channel bridge wells, with a 2-20 bit bridge, can flexibly distribute potential.
- Clear front identification and easy identification of the marked area.

STB spring-cage terminal blocks are made of high-quality alloy structure, providing reliable and durable connection products. It is possible to connect wires that have not been pretreated. The wiring capacity is large, and the wires with or without a cold pressure head of the rated wire diameter can be accessed. At the same time, the proven pull-back connection technology has excellent seismic performance and excellent performance in high vibration situations such as railways, ships, and equipment manufacturing. The plastic raw materials of PA66 UL94 VO can meet the working environment of - 40 °C to 105 °C.

## DC Steel screw terminal blocks

- The steel cage is used to clamp the wire, and the connection is stable and reliable.
- Double channel bridge position, easy to realize potential distribution.
- Pluggable bridges and rich accessory systems perfectly solve the application needs of the user end.
- Large area identification space, clear wiring.

DC Steel screw terminal blocks, steel screw and steel cage cooperate with clamp wire, with good torsion and stability. The carrier adopts high-precision copper alloy conductor provide the lowest temperature rise, and ensure reliable and safe connection. The raw materials of PA66 plastic parts can meet the working environment of -40°C to 105°C, all DC series products meet UL94 V0 flame retardant grade. Compact structure multi-conductor and multi-layer terminals, saving space in the cabinet.

## PC Copper screw terminal blocks

- Screw connection technology is adopted, with excellent connection airtightness.
- All copper alloy material, low contact resistance.
- The wiring is very flexible and can realize multi wire connection.
- Large area identification space, clear wiring.

PC Copper screw terminal blocks adopts copper screw and copper cage to cooperate with clamp wire to ensure excellent connection airtightness and maintain long-term low contact resistance. The raw materials of PA66 plastic parts can meet the working environment of -40°C to 105°C, all PC series products meet UL94 V0 flame retardant grade. Compact structure multi-conductor and multi-layer terminals, saving space in the cabinet.

## DHV KV screw terminal blocks

- Adopt screw self-locking technology, with excellent anti loosening performance.
- Rated voltage up to kilovolts, especially suitable for medium and high voltage applications in the power industry.
- Copper alloy material, low resistivity, excellent electrical conductivity.
- Double-channel bridge wells, with a 2-20 bit bridge, can flexibly distribute potential.
- Large area identification at 45°, marking areas easy to identify.

DHV high-voltage screw terminal blocks, using screw self-locking technology, have excellent wiring anti loosening performance. The copper screw and copper clamp body cooperate with each other to ensure the air tightness of long-term connections. High precision copper alloy conductive body minimizes temperature rise, ensuring reliable and safe connection. The plastic raw materials of PA66 can meet the working environment of -40 °C to 105 °C, and all PC series products meet the UL94 V0 flame retardant grade. The rated voltage of the through type terminals is up to kilovolts, Especially suitable for medium and high voltage applications in the power industry.

## BS Bolt connection terminal blocks

- BS Bolt connection terminal blocks, with bolt connection technology, secure connection.
- Multiple cable ends can be connected with a single screw, which can be used for power feed.
- Closed structure design at both ends, with protective cover, safe and anti-touch.
- Compatible with the marking system to clearly identify the working area.
- Equipped with test hole in the middle, easy to test the circuit.

### Application Industry

Rubber Manufacturing

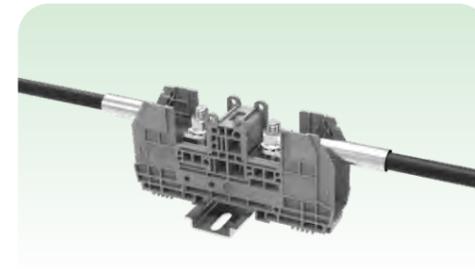

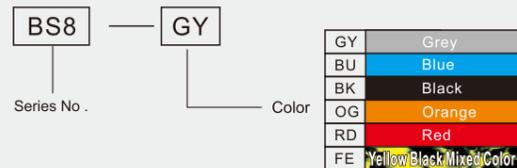

Building Machinery

Process Control

### HOW TO ORDER BS SERIES

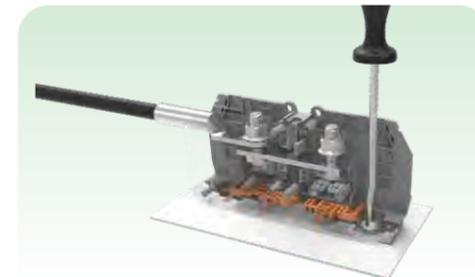

### Bolt connection

- BS Series products include BS8, BS10 bolt connection terminal blocks, can connect wires with diameters from 2.5mm<sup>2</sup> to 150mm<sup>2</sup>.

### Removable cover

- Closed structure design at both ends, with protective cover, safe and anti-touch.

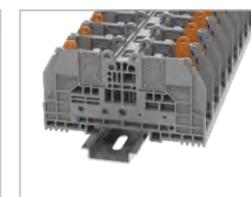

### Flexible installation

- Variety installation methods, available for panel & Rail mounted.

BS6

### Marking System

Degson marking system, providing a complete solution for industrial site identification case. Our thermal transfer printers and laser printers provide customers with Terminal blocks marker, Cable marker, Device marker Printing Service.

#### ZS Series Magazine

Model	PTT-ZS
Order No	99020000082

#### ZSF Series Magazine

Model	PTT-ZSF
Order No	99020000084

### Thermal Transfer Printer

- Support plate printing, marking the terminals.
- Thermal transfer printing technology, quickly realize batch printing.

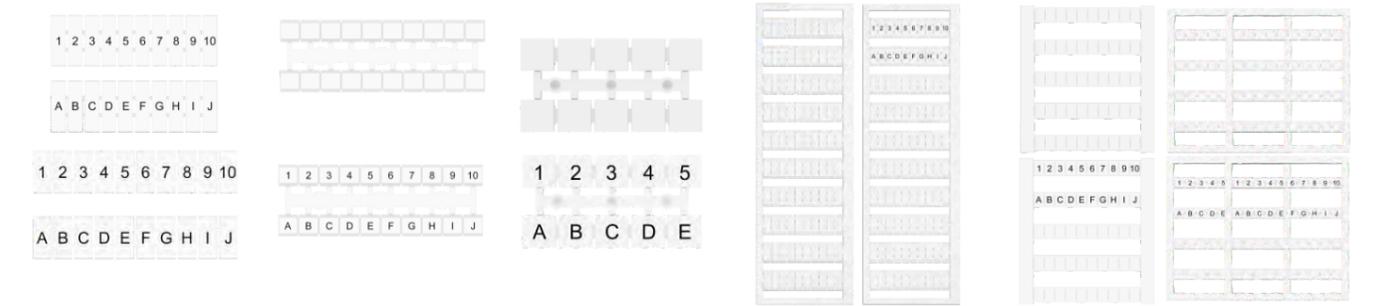

Model	PTT
Order No	99020000073

Model	SLP
Order No	99020000099

### Laser Printer

- Powerful and convenient to operate
- Class 1 laser, safety protection

## Automation

Full link intelligent control, building Industry 4.0 digital base

- Motion controller: multi-core processor load balancing, nanosecond command response, 1ms cycle 8-axis synchronization, compatible with mainstream PLC programming language.
- Remote IO module: 1ms communication cycle, a variety of industrial fieldbus protocols, flexible with functional modules, cabling costs reduced by 60%.
- Industrial switch: 5/8/16 port 100 gigabit optional, QOS quality service, BPS broadcast storm suppression function, intelligent identification of priority packets.
- Safety relay: through SIL3/PLe certification, dual channel safety loop design, cross short circuit diagnosis between channels, to build a strong defense line for personnel and equipment.

## Interface Electronics

- We offer a full range of relays with widths as low as 6mm, saving space. Provide a maximum load requirement of 1C 16A to 4C 10A. Screw and straight insertion base provide more connection options. Simultaneously providing solid-state relays to meet the needs of better working conditions.
- We offer all kinds of pre-made cable & module to realize fast wiring and save time. We can satisfy your connection demands, and support special requirements.
- We offer high-quality single-phase and three phase DIN rail power supplies, covering up to 960W, along with redundant module products to ensure reliable system power supply.

Durable and reliable

High load and high voltage

Easy installation

## Heavy-duty Connectors

- Adopting high-strength metal or engineering plastic shell, capable of withstanding significant mechanical stress and impact force.
- Having good sealing performance, it can effectively prevent external pollutants such as dust, moisture, and oil from entering the interior of the connector.
- Capable of carrying large currents and high voltages, ensuring insulation performance and electrical safety under high voltages.
- Simple connection structure, quick installation and disassembly, improves work efficiency, reduces equipment maintenance and replacement time.

## DSPT Series Surge Protectors

The protection system is immune to transient overvoltage and overcurrent, and can be applied to power systems, electrical equipment, data networks, and more. The new DSPT series surge protection solution adopts the main circuit release and large arc suppression plate arc extinguishing technology to avoid the influence of product aging on the release function, effectively release overcurrent and ensure the safe operation of the system. The integrated and split solutions can be perfectly matched with the distribution system, and various voltage and current levels are available, which can be applied to different power supply environments.

DSPT-T1/T2-320-25W-31R

Maximum Continuous Voltage( $U_c$ )	320V
Nominal Discharge Current( $I_n$ )	25kA
Voltage Protection Level( $U_p$ )	1.5kV

DSPT-T1/T2-320-25W-11R

Maximum Continuous Voltage( $U_c$ )	320V
Nominal Discharge Current( $I_n$ )	25kA
Voltage Protection Level( $U_p$ )	1.5kV

DSPT-T1/T2-760-25W-10R-B

Maximum Continuous Voltage( $U_c$ )	440V
Nominal Discharge Current( $I_n$ )	25kA
Voltage Protection Level( $U_p$ )	2.0kV

DSPT-T2-385-40M-31R

Maximum Continuous Voltage( $U_c$ )	385V
Nominal Discharge Current( $I_n$ )	20kA
Voltage Protection Level( $U_p$ )	1.3kV

DSPT-T2-385-40M-11R

Maximum Continuous Voltage( $U_c$ )	385V
Nominal Discharge Current( $I_n$ )	20kA
Voltage Protection Level( $U_p$ )	1.3kV

DSPT-T3-255-6M-11R

Maximum Continuous Voltage( $U_c$ )	255V
Nominal Discharge Current( $I_n$ )	3kA
Voltage Protection Level( $U_p$ )	1.25kV

DSPT-PV-600-40M-21R

Maximum Continuous Voltage( $U_c$ )	600V
Nominal Discharge Current( $I_n$ )	20kA
Voltage Protection Level( $U_p$ )	2.8kV

DSPT-PV-1200-40M-21R

Maximum Continuous Voltage( $U_c$ )	1200V
Nominal Discharge Current( $I_n$ )	20kA
Voltage Protection Level( $U_p$ )	4kV

DSPT-PV-1500-40M-21R

Maximum Continuous Voltage( $U_c$ )	440V
Nominal Discharge Current( $I_n$ )	20kA
Voltage Protection Level( $U_p$ )	5kV

DSPT-MCR-LF-24V

Maximum Continuous Voltage( $U_c$ )	33V
Nominal Discharge Current( $I_n$ )	5kA
Voltage Protection Level( $U_p$ )	47V

DSPT-CAT-LAN-J45-4

Maximum Continuous Voltage( $U_c$ )	5V
Nominal Discharge Current( $I_n$ )	2.5kA
Voltage Protection Level( $U_p$ )	40V

DSPT-CAT-VID-J45-2-30

Maximum Continuous Voltage( $U_c$ )	385V
Nominal Discharge Current( $I_n$ )	5kA
Voltage Protection Level( $U_p$ )	1.5kV (power supply)/ 13V (network signal)

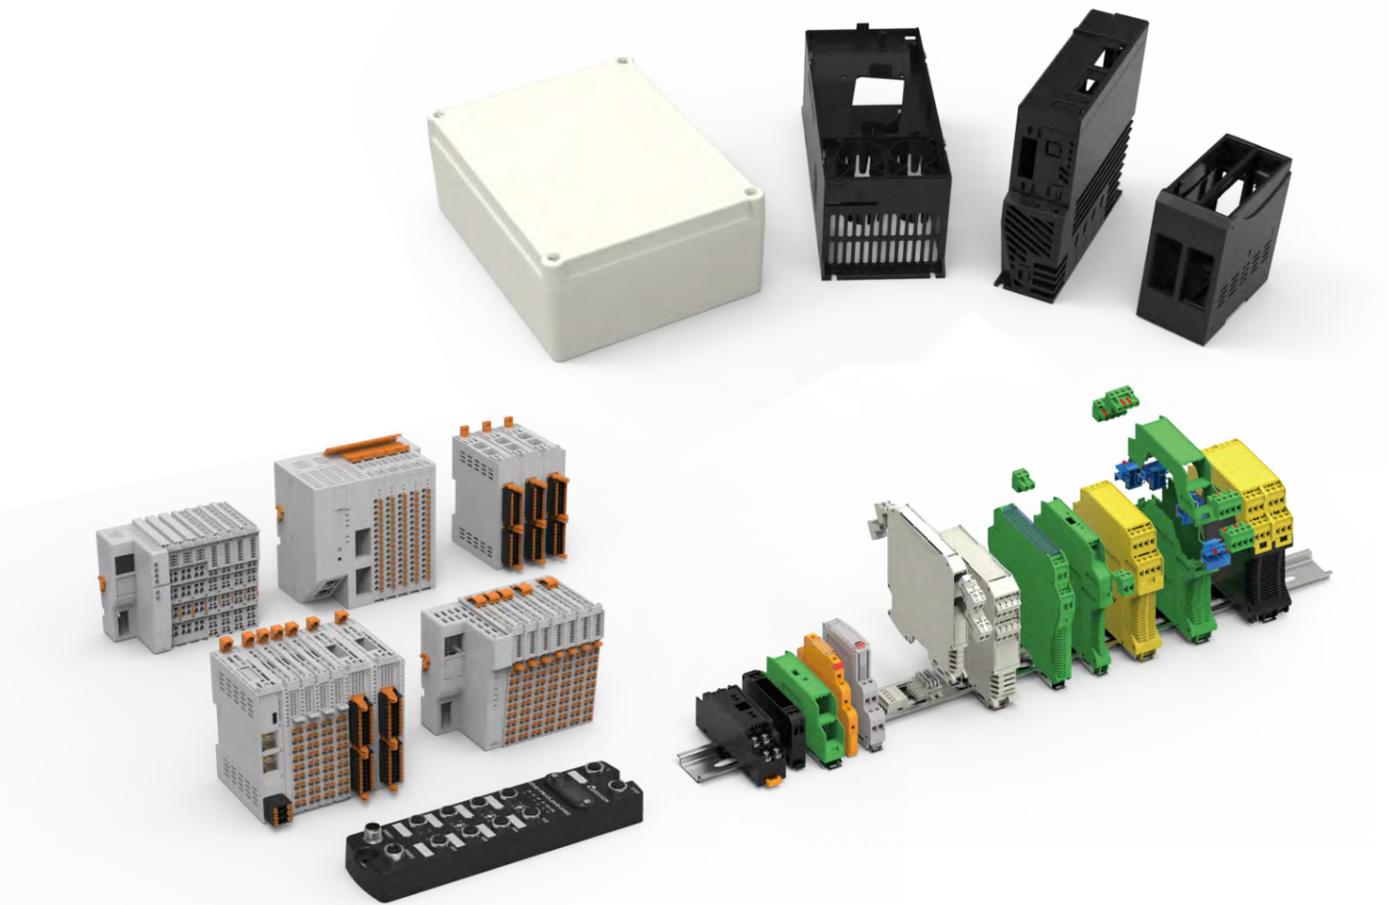

## DT22M / DT22MU Button Switch

The DT series push-button switches are the result of DEGSON's research into customer field applications and industrial controls. It is mainly used to control the mechanical connection and disconnection circuit, so as to control the motor or other Equipment. A switch for the purpose of operation of electrical equipment. This series of products adopts advanced fastener-free self-locking connection, reliable contact, efficient and fast disassembly, the product's impact resistance, seismic performance is stronger, suitable for application. For use in harsh environments. Product design and development meet IEC60947-5-1, GB/T14048.5 and other standard requirements. Widely used in machinery manufacturing, rail transit, elevator, electric power, wind power and other industries.

## Shell Customization

- The professional team will provide all-round support from development, production, quality assurance to implementation.
- Early participation of suppliers, covering raw material selection, design for manufacturability (DFM), design of experiments (DOE), mold flow analysis, product prototyping, etc., shortening project time and reducing customer costs.
- High level and vertical integration, response to customer requirements quickly with it's own mold workshop and processing, manufacturing equipments.
- Whole-process integrated value-added services, providing supporting services such as printing, painting, hot-melting, assembly, etc.
- Approved by ISO9001:2015, ISO14001:2015, has a complete quality control system and measurement system.
